

ABSTRACT

A blind trimming apparatus and method of trimming blinds. The blind trimming apparatus includes a frame, a first pair of opposable cutting dies, at least one of which is moveable relative to the frame between a retracted position and an extended position, a  
5 second pair of opposable cutting dies, at least one of which is moveable relative to the frame between a retracted position and an extended position, and a carriage supported by the frame and supporting the second pair of opposable cutting dies. The carriage is moveable with respect to the first pair of opposable cutting dies to vary the distance between the first pair of opposable cutting dies in the extended position and the second  
10 pair of opposable cutting dies in the extended position.
